To Whom It May Concern:

Greetings from Rome, GA. I have just recently become an avid fan of XM Radio and its satellite broadcasts. I have it in my car and in my home. I have been wondering why I had not purchased it earlier. It is nice to be able to listen to your favorite music and talk radio, as well as 24 hr traffic/weather forecasts, anywhere you may happen to be in this great country - with fantastic quality of sound.

However, I am now very concerned that some of this "may" be taken away from us because of a few: the NAB. I want to have the freedom to choose to listen to traffic and weather reports from major cities whenever I wish (especially since I "pay" for it). - such as now being made available by XM Radio. We have enough regulations now (too many as a matter-of-fact). Therefore, I humbly request that you "reject" NAB's petition 04-160.

Thank-you for your attention to this matter AND thank-you in advance for rejecting the petition 04-160.
